

BATTERY-POWERED WIRELESS MOBILE COLUMN LIFTS

36,000 LB. CAPACITY / 9,000 LBS. PER COLUMN

The Wireless Mobile Column Lift built to last with ball-screw technology for precise control and maximum efficiency.

- ✓ Low maintenance, high reliability
- ✓ Safe, secure & ALL-certified
- ✓ Direct service & support team
- ✓ Proudly manufactured in the USA

WHY MOBILE COLUMN LIFTS?

- **Zero installation, zero downtime** – Lifts are delivered ready to use; no construction, no installation, no assembly.
- **Ultimate flexibility** – Use in any bay for what you need when you need it and then roll the lifts away for an open workspace.
- **Incredible versatility** – Configure to lift any vehicle with any wheelbase just by repositioning the columns.
- **True wireless freedom** – Fully self-powered with long-lasting battery life to eliminate cords, cables and trip hazards.

Recirculating stainless steel ball screw

WHY BALL-SCREW TECHNOLOGY?

- **Inherently safe design** – Irreversible by design with continuous mechanical locking—if it's stopped, it's locked!
- **Smooth operation** – Precise control with natural synchronization and quiet operation across all columns. Work at any height with no lock points.
- **Easy maneuverability** – Compact design, lightweight, fixed column height; none of the bulk or rising mast associated with hydraulic lifts.
- **Low maintenance** – Simple, infrequent lubrication with no seals to check, no bleeding, no leaks, no mess.

NO HYDRAULICS. NO MESS. NO DRAMA.

SPECIFICATIONS

Model	BPW-4-4-AJ
Per Column Capacity	9,000 lbs.
Height	97"
Max. Lifting Height	69"
Fork Length	15"
Charge Power Supply	110V 60Hz
Motor Power	2 HP
Approx. Weight	1,195 lbs.

Additional available capacities (per arm):

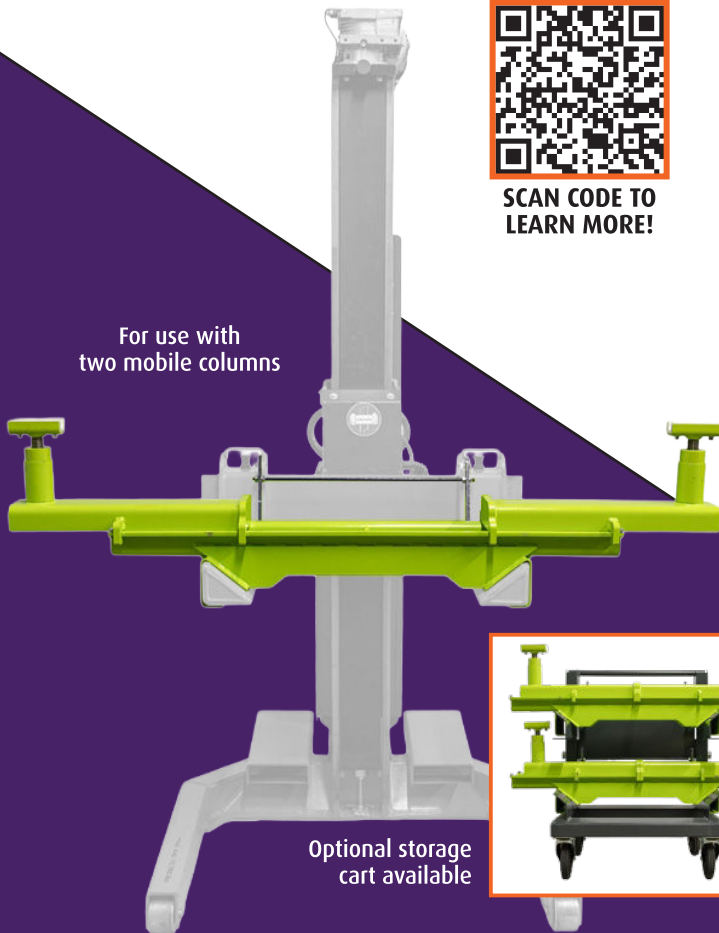

- 12,000 lbs.
- 14,000 lbs.
- 16,000 lbs.
- 18,000 lbs.

Compact design allows technicians full, unobstructed access under the vehicle
